Morgan Patel

Cloud Security Engineer
Denver, CO | morgan.patel@example.com | (303) 555-0187 | linkedin.com/in/morganpatel-sec | github.com/morganpatel

PROFESSIONAL SUMMARY

Cloud Security Engineer with 6 years of experience securing AWS and Azure for regulated SaaS companies. I specialize in IAM, CSPM, detection engineering in Splunk and Microsoft Sentinel, and security automation with Python and Terraform. Cut critical cloud misconfigurations 72% across 60 AWS accounts and reduced mean time to detect from 4 hours to 9 minutes.

TECHNICAL SKILLS

Cloud & Security: AWS, Azure, IAM, GuardDuty, Security Hub, AWS Config, CloudTrail, KMS, SCPs, Wiz, Microsoft Defender for Cloud, Entra ID

Detection & Response: Splunk, Microsoft Sentinel, KQL, SIEM, SOAR, CrowdStrike, Incident Response, Threat Hunting, MITRE ATT&CK

Engineering: Python, Bash, PowerShell, Terraform, CloudFormation, Kubernetes, Docker, GitHub Actions, CI/CD, Policy as Code, Checkov

Frameworks: NIST 800-53, CIS Benchmarks, SOC 2, PCI DSS, HIPAA, Zero Trust, Threat Modeling

PROFESSIONAL EXPERIENCE

Senior Cloud Security Engineer | Brightwave Health | Denver, CO — Mar 2022 – Present

- Engineered 40 AWS Config rules and Security Hub automations across 60 accounts, cutting critical misconfigurations by 72% in 9 months.
- Designed SCPs and permission boundaries that removed 38 privilege-escalation paths and enforced least privilege for 900 IAM roles.
- Built 55 Splunk and Sentinel detections mapped to MITRE ATT&CK, reducing mean time to detect from 4 hours to 9 minutes.
- Automated GuardDuty finding triage with Python and Lambda, closing 85% of low-severity alerts without analyst time.
- Led incident response for 14 cloud security incidents, including a leaked access key contained within 22 minutes.
- Integrated Checkov and Wiz into GitHub Actions, blocking 300+ insecure Terraform changes before deployment.

Security Engineer | Ledgerline Payments | Boulder, CO — Jun 2019 – Feb 2022

- Hardened Azure and Entra ID with Conditional Access and MFA for 3,500 users, eliminating legacy authentication.
- Migrated 120 detection rules to Microsoft Sentinel and tuned them, lowering false positives by 60%.
- Ran vulnerability management with Tenable for 2,000 assets, raising on-time critical patching from 61% to 97%.
- Prepared evidence for PCI DSS and SOC 2 audits, passing both with zero major findings two years running.

PROJECTS

Cloud Detection Lab | github.com/morganpatel/cloud-detection-lab

- Built a Terraform-deployed AWS attack lab with 12 Stratus Red Team scenarios and matching Sigma detections, used by 400+ GitHub users.

EDUCATION

B.S. Computer Science | University of Colorado Boulder — 2015 – 2019

CERTIFICATIONS

- AWS Certified Security – Specialty (SCS-C02)
- Microsoft Certified: Azure Security Engineer Associate (AZ-500)
- CompTIA Security+ (SY0-701)
- CCSP – Certified Cloud Security Professional
